### Description:

(See attached file: Organics in Dimock.xlsx)

**Time critical!** We are hoping to get your best read on data from Dimock.

We have identified that OSWER's Risk-Based Screening Levels for Drinking Water for Arsenic, Aluminum, Iron and Manganese have been revised with latest update:

[http://www.epa.gov/reg3hwmd/risk/human/rb-concentration\\_table/Generic\\_Tables/index.htm](http://www.epa.gov/reg3hwmd/risk/human/rb-concentration_table/Generic_Tables/index.htm)

In addition, the attached table lists organics that have been identified (many at very low levels) in some recent samples, for which we are trying to ascertain risk.

Many thanks!
